When the Party's Over: The Politics of Fiscal Squeeze in Perspective

In today's era of fiscal austerity, fiscal consolidation and spending cutbacks dominate the politics of many of the world's democracies. Street protests, rule by 'econocrats' and draconian policy shifts dictated by – or blamed on – international creditors have become commonplace. Old political alignments are being tested and new battles are emerging over whose expectations are to be disappointed and who should be blamed for fiscal squeeze.

This conference aims to explore how the politics of fiscal squeeze has played out

in different times and places, looking in depth at half a dozen historical cases of fiscal squeeze, exploring what conclusions we can draw for current debates about fiscal squeeze from earlier cases in other democracies.

Followed by a lecture and panel discussion
